

Dear Ladies and Gentlemen,

we are pleased that you also would like to establish sustainable approaches in your company for our future. We trust in your good intentions and assume that you are providing all information truthfully.

In order to be able to determine the consumption of plastics in your company, you need to find out the amount of plastic used for packaging your products. Additionally to the waste directly connected to your product we add the quantity of plastic waste which you dispose in your premises. This includes yellow bags or bins, troughs and containers of all kinds.

In the following table you will find conversion values for calculating your donation volume in order to be able to make a successful compensation.

Quantity and unit	Compensation (rough amount of donation)
1 kg	0,67 €
1000 kg / 1 t	666,67 €
1 liter recycling waste without metals	0,02 €
1000 liter / 1 m <sup>3</sup> (commercial plastic recyclables without metal)	16,67 €

Tabelle: Life e. V., Stand Q2/2020

Nevertheless, we hope that the donation will be relatively small, because this means that you have long since embarked on the path to a mindful future.

If you have any questions, please do not hesitate to contact us.
